Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

Building #745 is categorized as an ammunition/explosives/toxics facility; it was built in 1955. It is primarily constructed of concrete with the addition of aluminum for the wall construction; the roof is constructed of gypsum plank with built-up asphalt. The main building measures 205' x 53'9" and has two offsets, the first measures 14' x 33' and the other measures 16' x 33'.

The building has served and continues to serve as an ordnance assembly plant; the plant is used to assemble, disassemble, load and inspect various calibers of ammunition. The building has witnessed minor upgrades to ensure compliance with safety requirements, such as, the addition of an alarm system, the installation of a water softener, and the installation of a high-speed sprinkler system.

Building #745 has served only as a support facility; it has been used to assemble ordnance. Criterion A is not applicable because this building is not unique to any particular testing program; in other words, it is not associated with a significant event. Regarding the other criteria, there is no connection to a significant person (Criterion B), no architectural or engineering significance (Criterion C), and has no potential to yield additional information about history (Criterion D). It is our opinion that this building is not eligible for the NRHP.
